RE: LaSalle to Wedron to Ottawa 138kb  
Electric Transmission Lines

Dear Chairman Box,

Enclosed please find our Petition to the Illinois Commerce Commission to deny Ameren IP approval to install transmission lines along a proposed Illinois Route 71 Alternative.

Ameren property acquisition representatives have been in contact by mail, personal meetings and telephone with property owners attempting to secure R.O.W. options along Illinois Route 71. Notwithstanding, our organization believes we have obtained the signatures of nearly 100% of the land owners objecting to the "Ottawa-Fox River (Primary)" route.

While our organization believes Ameren's project should be approved, we feel very strongly that Ameren has other alternative routes available to it, as suggested by their literature to Illinois Route 71 property owners. (See Ameren route map)

We ask that IL 71 Resistors be formally identified as an objector and that we receive notice of any proceedings with regard to Ameren's application.

Respectfully Submitted,

Robert Trumbo, President

PETITION TO THE  
ILLINOIS COMMERCE COMMISSION  
AMEREN ROUTE 71 ALTERNATIVE

We, the undersigned, land owners and/or operators or tenants of property on and along Ameren's proposed IL Route 71 "Ottawa-Fox River (Primary)" transmission line expansion do hereby Petition the Illinois Commerce Commission as follows:

1. Deny any application for use of Eminent Domain.
2. Require Ameren to construct upon another Alternate Route for the line expansion, and in the support of the same we state as follows:
  - A. Installation of high powered electric lines will greatly diminish the fair market value of the homes and real estate located on and along Il Rt. 71;
  - B. Installation of high powered electric lines will negatively affect the motoring public on and along Rt. 71 due to construction AND, more importantly, could possibly prohibit expansion of Il. Rt. 71 into a four (4) lane thoroughfare as was required in the Yorkville/Oswego/Aurora areas, due to growth;
  - C. Ameren already has designated a superior alternative route ("Ottawa-Fox River Alt. #2" ) in that Ameren would only have to "negotiate " with one Illinois Commerce Commission Licensee; and
  - D. While the evidence is conflicting, local residents are very concerned about any potential health hazards which may be suffered by those near said transmission lines, and this is especially important as the lines are within one quarter (1/4) mile of Rutland School.

We, a group known as IL 71 Resisters, acknowledge the need for Ameren to expand its transmission lines to provide for growth in this community which is destined for further growth. However, we, as a group, respectfully submit to this Agency It require Ameren to use another alternate route for installation of said transmission lines.

This Petition is executed by land owners and/or operators or tenants who are located on or along the proposed "Ottawa-Fox River (Primary)" route commencing at the intersection of Il. Rt.71 and US Rt. 6 up to and through the Wedron Substation.

The land owners/operators/tenants in opposition to the proposed Rt. 71 "Ottawa-Fox River (Primary)" route are as follows:
